⬡ GuardLens Extension Disclosure

GuardLens collects user data, such as browsing data with pseudonyms (i.e., a fake name). All data collected by GuardLens will be used solely as part of an approved research investigation, done in connection with the **Inclusive Privacy Project** and in affiliation with the **University of Illinois at Urbana-Champaign**. GuardLens is an unlisted browser extension, and only recruited research participants will be given a link to download.

Data Collected

We collect several different types of information related to our research, including browsing data and extension usage information. Users are given a pseudonym (i.e., a fake name) to protect their identity, and no personally identifiable information is collected. Specific types of information collected include:

- Browser information and version
- Operating system information and version
- Websites visited
- Category/topic of websites visited
- Time spent on each website visited
- Origin of websites visited (e.g., direct, search engines, etc.)
- Usage statistics such as
  - What websites you use the extension on, including their category or topic
  - System messages shown to you
  - Your engagement with the system (e.g., clicks on messages, time spent reading messages)

Data Use

We only use these data for research purposes and product improvement. We do not share your data with any third parties. We may share anonymized data in the course of publishing and sharing the results of our research. Any information we share will use the above-described pseudonyms to make users anonymous.

Privacy Policy

If you want to know more about data collection, use, sharing, security, and retention in GuardLens, please visit our **Privacy Policy**

Consent

Please indicate below whether you consent to this data collection and use or you wish to uninstall the browser extension.

[I consent, start using GuardLens]   [I do not consent, uninstall the GuardLens extension]
